

eyetv micro

DTT TV Tuner for Micro USB

Watch live TV on your Android device with EyeTV Micro – without touching your data plan. The ultra-compact TV tuner connects directly to your Android-device, receives DTT TV signals and doesn't even rely on a separate power source.

Position the telescopic antenna for the best-possible reception on the go, or connect the freely positionable rod antenna in areas with poor reception – you decide. EyeTV Micro turns your Android device into your TV of choice wherever you are.

System Requirements

These Android devices support EyeTV Micro:

- Google: Galaxy Nexus, Nexus 7, Nexus 10
- HTC: One X (Android 4.1.1 or later)
- Samsung: Galaxy Note, Galaxy Note II, Galaxy SII, Galaxy SIII

Please refer to www.elgato.com/eyetvmicro for an up-to-date list of supported devices. EyeTV Micro requires an Android device with a dual-core CPU, NEON support (e.g. Tegra3), USB host mode functionality and Android 4.0.3 ("Ice Cream Sandwich") or later.

What's included

- EyeTV Micro DTT tuner
- Miniature telescopic antenna (MCX)
- Rod antenna with magnetic base and detachable suction cup
- Micro USB to USB cable
- Software download guide (THC and EyeTV 3)
